PROFESSIONAL SUMMARY

Senior Front-End & Full Stack Engineer with 10+ years of experience building enterprise web applications and internal portals across **React, Angular, and Vue** — with **TypeScript, Next.js, and Node.js** at Fidelity, Bank of America, Walmart, and 7-Eleven. Deep expertise in micro-frontend architecture, CMS-driven platforms (Sitecore, SDL Tridion), GraphQL/REST integrations, and WCAG accessibility, with full-stack delivery across GCP, AWS, and Azure.

CORE COMPETENCIES

- Front-End Architecture • Full-Stack Development • Micro-Frontends • Enterprise Portals/Intranets
- Accessibility/WCAG • API & Enterprise Integrations • BFF/Middleware • CMS Platforms • Cloud (GCP/AWS/Azure)
- CI/CD & Observability • Performance Optimization • Code Reviews / Mentoring

TECHNICAL SKILLS

Front-End	React.js (18+), Next.js, TypeScript, JavaScript, Redux, Vue.js (3+), Angular (19+), HTML5, CSS3, SASS/LESS, Tailwind CSS, Material UI, Ant Design, Bootstrap, D3.js, Ag-Grid, Redux Toolkit, Storybook, jQuery
Back-End	Express.js, Node.js, GraphQL, REST APIs, Fastify.js, BFF/Middleware, OpenAPI, Java, Kafka
Cloud & DevOps	GCP (GKE, Cloud Build, Secret Manager, BigQuery, Pub/Sub, Logging/Monitoring), AWS (S3, Lambda, CloudFront), Microsoft Azure, Docker, Jenkins, CI/CD
Data	MongoDB, PostgreSQL, Redis, Elasticsearch, Cassandra
Testing	Cypress, Playwright, Jest, React Testing Library
Enterprise & Tools	Sitecore, SDL Tridion, ServiceNow, Oracle, UKG, Datadog, Splunk, New Relic, GitHub, GitLab, Webpack, Vite, Nx, Figma, Power BI, CKEditor

EMPLOYMENT HISTORY

Fidelity <i>Full Stack Software Engineer</i>	Westlake, TX Feb 2025 – Present
• Develop features across multiple healthcare HSA applications within a micro-frontend architecture — TypeScript, Node.js, Next.js, React, GraphQL, Angular and Vue.js — reducing development effort by 25%. • Built a new enterprise application using Angular (19+) and TypeScript, integrated into Fidelity's MFE architecture. • Used AI-assisted development (prompt-driven coding, reviews, and testing) to speed up delivery. • Triage and resolve production incidents for HSA applications, using ServiceNow, Splunk, Datadog, and Omnibug for log analysis, troubleshooting, and root-cause analysis. • Produce Java API clients with internal OpenAPI code generators; manage the Nx monorepo. • Enhance legacy enterprise UI workflows using jQuery for event handling, DOM updates, and AJAX. • Deliver CMS-driven pages on SDL Tridion and Sitecore using React/Vue components. • Partner with UX/Accessibility teams (Figma, CAT tools, WCAG reviews) to deliver accessible interfaces. • Handle CI/CD deployments with Jenkins and Kompass; monitor Kubernetes pods and production testing.	
Bank of America <i>Senior Front-End Engineer</i>	Plano, TX Aug 2024 – Feb 2025
• Built responsive enterprise UI with React 18, Next.js, Redux Toolkit, and Vite, cutting build times by 20%. • Built reusable content-authoring components with React Hooks, Kendo UI, and CKEditor for enterprise pages. • Implemented Next.js routing, middleware, and server-side rendering (SSR) to support secure, scalable enterprise workflows and API integrations. • Connected Next.js pages to Oracle-backed REST APIs and translated Figma designs into WCAG-aligned UIs. • Conducted code reviews focused on scalability, maintainability, accessibility, and cross-browser compatibility.	

Walmart

Dallas, TX | Jan 2022 – Aug 2024

Software Engineer III

- Led UI development for an **internal employee portal/intranet** using **React.js, Redux, JavaScript, and Webpack**.
- Built a **Node.js BFF on GCP** integrating React workflows with UKG and other enterprise APIs.
- Managed **GKE pods**, deployments, rollouts, and logs for production releases and availability.
- Used **GCP Secret Manager** for application configuration and environment secrets.
- Built live data integrations with **Kafka** and **WebSockets**, streaming real-time operational data to portal users.
- Integrated **Cypress, Playwright, and Jest with GCP Cloud Build CI/CD**, reducing regression issues by 40%.
- Used **GCP BigQuery and Power BI** for operational reporting, improving data visibility by **75%**.
- Used **GCP Cloud Logging/Monitoring and Lighthouse** for production troubleshooting and performance tuning.

7-Eleven

Irving, TX | Mar 2020 – Jan 2022

Software Engineer II

- Built reusable UI components using **React.js, Next.js, Redux, TypeScript, SCSS, and Storybook** for consistent cross-device experiences.
- Built **REST/GraphQL APIs with Node.js, Express.js, and AWS Lambda** in a microservices architecture.
- Implemented **JWT-based authentication and authorization** for secure application and API access.
- Built a reusable **shared component library** and a React + Express **SSR** boilerplate, enabling new applications to launch faster with standardized UI and architecture.
- Developed a remote login application using **Next.js** with server-side rendering and middleware, delivering secure and fast sign-in for remote users.
- Improved data retrieval by 20% using **MongoDB and Redis cache**.
- Used **New Relic** to identify and resolve application performance bottlenecks.
- Optimized UI performance using **Webpack, code splitting, and lazy loading**.
- Integrated **AWS S3, Lambda, and CloudFront** for hosting, APIs, and deployment pipelines.

HPE Aruba

Santa Clara, CA | Feb 2018 – Feb 2020

UI Engineer

- Maintained enterprise UI using **React.js, JavaScript, jQuery, AJAX, HTML5, and CSS**.
- Built reusable React components using **Material UI**, and interactive data visualization charts using **D3.js**.
- Engineered APIs using **Fastify.js and Express.js** with **PostgreSQL, Cassandra, and Elasticsearch**.
- Implemented **Jest and React Testing Library** tests, achieving 80% code coverage.
- Provided design and code review feedback on **GitLab**, reducing defects by 15%.
- Built **responsive, cross-browser dashboard interfaces** for network monitoring and device management workflows.
- Optimized **rendering performance** for data-heavy tables and charts used in operational monitoring views.
- Built and deployed enterprise dashboard applications on Microsoft **Azure** cloud infrastructure.
- Partnered with designers and backend engineers in **Agile sprints** to deliver incremental UI releases.

State Street Bank and Trust

Quincy, MA | Nov 2015 – Feb 2018

UI Engineer

- Managed full SDLC of a large-scale **enterprise intranet portal** using React.js, Redux, JavaScript, jQuery, and SQL.
- Applied **React Routing** across enterprise workflows to improve navigation.
- Used **Numeral.js, Moment.js, Lodash, and Axios** for formatting, APIs, and data transformation.
- Integrated **REST endpoints and Oracle-backed data** with React/Redux flows.
- Enhanced screens using **jQuery** for DOM manipulation, event handling, and data updates across legacy modules.
- Streamlined sprint delivery using **Rational Team Concert** for task tracking and coordination.
- Developed reusable UI components and page templates, **cutting new-screen development time by 30%**.
- Collaborated with **business analysts and QA teams** across requirements, testing, and release cycles.
- Resolved **production UI defects** and supported release deployments for internal business users.

EDUCATION

Master of Science in Applied Computer Science — Northwest Missouri State University, Maryville, MO

Bachelor of Technology in Information Technology — Jawaharlal Nehru Technological University, India
